

EDUCATIONAL KITS

Available for loan to Idaho residents. Free!

IFPC Paper-Making Kit

The *Paper-Making Kit* contains the STUFF of paper-making. Also included are samples of wood chips and screen from an industrial paper mill. Add to that DVDs, posters, brochures about recycling and directions for making paper with any grade level, and you're ready to conduct a fantastic learning experience!

NOTE: You will need to provide a plastic tub, towels, water, rolling pins (optional), blender (optional) and iron (optional).

Paper-making is a wonderful tool for interdisciplinary learning, incorporating science, language arts, social studies, and visual arts. And best of all, at the end of the process, students have a product they made themselves that is both practical and beautiful!

IFPC Forester Tools Kit

The *Forester Tools Kit* contains tools just like those used by professional foresters.

Included in the kit:

Increment borer: Easily retrieves core samples from trees to determine growth rate and age.

Logger's tape: One side of the tape measures length, the other side measures diameter.

Clinometer: Makes measuring height, slope and vertical angles easy!

Instructions: For how to use the tools.

The kit includes clear directions for how to use the tools.

I'd like to borrow: _____ IFPC Paper-Making Kit _____ IFPC Forester Kit

While there is no charge for use of the kit, I understand I am responsible for shipping costs to return the kit in good condition by the due date.
