

Brinley Edwards, age 6, grade 1  
Mrs. Cobb  
Silver Trail Elementary, Kuna, ID

My name is Brinley, I am going to talk about log cabins. Log cabins are made out of logs, and logs are made out of trees. The trees start by seeds. The seeds grow into a baby tree. The baby tree grows and grows into a grown up tree. There is wood everywhere around me! Even my bed frame and dresser are made out of wood. I love to come in the mountains and I love to build stuff with wood. I love building stuff with wood, like tables, and benches. It is fun to build stuff with wood! There are a lot of other things around me made of wood. My house, the doors, and all the books are made out of wood. It is so fun to climb up trees in my yard. When I climb a tree (which I love to do) it makes me wonder what I can do with trees. You can make beds, books, houses, furniture, sawdust, and cabins. A tree is a very important plant in life. It would not be the same without trees.
