Enzo's Forest

I Love trees. People need to keep the forest renewed by cutting down and planting new trees responsibly.

I like to climb trees to see how far up in the branches I can get. In the fall, I watch all the pretty changing colors of the trees and I enjoy jumping and doing flips into huge mountains of piled leaves.

Forests are more than just trees, they are tons of things. They are made up of bushes, grasses, rocks, dirt, rivers, and lakes. Last spring my friend and I went camping in the mountains. On our razor ride, we stopped to pick up cans and trash along the trail. to help keep our beautiful forest.

I love trees! Please try to keep our forests clean and healthy so we can enjoy them for years to come.
