## I Love Trees

Trees give us a lot of things. They give us oxygen, books, paper, houses, and fire. Without trees it would be really hard to live. My favorite things from trees are books. I LOVE BOOKS. I read at least 20 books a day, all kinds of books, like *Harry Potter* to books about magnets or dolphins. Even though you can read books on a computer or tablet, I like to read a book made from trees and paper.

I also love our fire in cold weather. I like to sit by it and get warm. Without trees we wouldn't have our fire and we wouldn't be very warm. I went with my dad a few weeks ago to get firewood. It was fun and hard work! My dad would cut up dead wood and we stacked it in our truck. We helped clean up the forest, and the forest helped us!

Our cupboards, house, tables and chairs, and floors are all made of wood. I have made lots of things out of wood. I made a present for my friend out of wood. We also made a climbing wall out of wood, and a tree house.

This is why I love trees!
