

## The Aliens Invade

It was the first day of the year. It was the day the aliens said they would invade. And at 1:30 p.m. a.u.f.o came. They started to invade! They got in our house. So, we had to take a risk and get out of our house and get in our car. We drove to the airport and got in our rocket ship. It was a good thing that my dad knew how to fly a rocket ship! We took off. We found a planet called Stuv. We are going to live there. I got out and realized there are no trees. It made me mad! There is no syrup, no water, no rain, and no

fire to make us warm. Cause that planet was cold! I told my dad, and he said, "Well, we will have to get a tree." We took off and landed, and we got a tree. We got back and planted it. I saw an alien, and I saw the u.f.o. I knew that was their home. I knew they wanted trees. So I taught them, and we went home. I woke up and knew it was just a dream and went back to bed. I knew how important trees are!
