Crafts

Forest products give me a better life and help me create.

My brothers and I made sling shots with sticks that came from trees. The sticks are shaped like a letter Y. We attached rubber tubing and a leather strap to the stick. Mine can shoot almost up to a mile!

I make a lot of paper crafts. I like to cut shapes out then tape or glue them together. Today I made a 3-D skeleton for Halloween then hung it on my wall. I also cut out shapes of two people helping each other. I make crafts every day from paper, sticks, and cardboard. This makes me happy.

I am grateful for forests because they help me make crafts.

out of people
h other.

I made a ton of Christmas
postcards for other people.

This is the 3-D skeleton for

I made this clock out of a paper
plate!

I drew the spider in its web and
have bugs climb through the holes.
