

How trees affect me

Trees affect me in lots of different ways. I live in a log cabin in the woods and we heat our cabin with a wood burning stove. When I go to school I use paper and pencils and sit at a wood desk. I like to read books that are made from paper from trees.

In our class we are reading Little house in the big woods and they use trees a lot and they make fires with them like Pa using a stump to smoke their meat and Laura and Mary had a tree house. My Dad works at a ranch and the trees make the fences to keep the cows in and they live in barns. At night when I lay in bed I read my Bible made from trees too.
