

I love and appreciate the forests and trees of Idaho. I appreciate that we have fresh, clean air that you have provided. I love being in the forest because it is shady and cool and dark, and I love to be there. I am glad that we have good firewood to keep our house warm in winter. I like to roast hot dogs over fires when we camp, and we have campfires because of you. I love that you keep all the animals that I love safe, warm, and happy. Your bendy branches make little houses for the animals.

My grandma and grandpa live in Idaho's forests. Their house is made of wood, which comes from Idaho trees. I love going to their house and playing in the forest.

I'm glad that I have good drawing paper that I get from you. I *love* climbing trees, and I couldn't do it without you!

I will never litter in you and will try to pick up litter and not leave a trail. When I am old enough, I will take the dead trees for firewood. I will always take just enough firewood. I will protect you in any way I can.
