

What Trees Do for Us

Dear Trees,

I thank you very much,

For all the things you have done for us.

There are so many reasons as such,

You give us big wood planks to make big strong houses, so we don't look sus.

You inhale carbon dioxide, release oxygen, and make the air pure.

You also make Earth's colors stand out and keep people off their phones.

Hopefully, other people think the same as me, but nobody can be so sure.

I love how trees work; they have wood instead of bones.

But now let's not think about what you can give to us, but what we can give to you,

If 'Yew' are hurt, I'll make sure your 'Oakay'

I'll stay day and night until you say I'm 'Pine'

I love to see all the healthy tree's branches sway.

I won't let people cut too much of you and cross the line.

People think that trees only come in one form, but that it no so.

Infact, some trees are very 'Poplar'

The most 'mainstream' trees of Idaho are the Western White Pines,

A lot of folks are barking up the wrong tree and are not mature.

So, if any tree needs help it will be my 'pleseantree'

Thanks to all the fruit trees for making the barren places into thriving places and thanks to the oak tree for teaching me a little lesson on 'geometree' and 'chemistree' without any stumps.

I 'fernly' 'beleaf' my puns are 'Qualitree'!!
