## My Forest by: Ryan Montebon

The forest is awesome! I love it so much! It is a place where my family can go camping. Many people like to go hunting there. The forest gives jobs to a lot of people. I love going camping with my family because we can play, have family, and we can watch the animals. We can also look at the beautiful view. We can sit by the warm fire. We can listen to the amazing sounds.

I love hunting because there are so many animals you can see deer, bears, and birds. The forest is a great place to hike and enjoy the woods. A lot of people hunt because it is a great way to get out of nature.

The forest gives people jobs like ranger, millworkers, loggers, truck drivers, road builders, and guides. The guides guide you through the forest. Millworkers make paper. The road builders build new roads. Truck drivers take the logs to the mills. It is a way for people to earn money to support themselves.

The trees in the forest are important. If we cut down trees we need to plant new ones. We need to take care of our forest.
