

DAILY LIFE AND TREES

by Sam

I enjoy spending time with my family in the forest. We do biking in the forest. We always go hiking in the forest. ~~Ol~~ ~~saw~~ we go fishing in the steep misty cold mountains. We like to climb trees because it is fun!

Forest products help in many ways. First the forest helps us by producing oxygen for us to breath clean air. The forest gives us

paper products. Trees helps us to have shade
In addition the forest helps us to make
homes with the lumber we harvest
from the forest in our community.
