Trees

I like bugs. Trees help me watch bugs. I can come close to a tree to see the bugs. I have found praying mantises, earwigs, and ladybugs on trees. Grasshoppers like the shade from trees.

I like trees because they help the bugs live. Bugs would die without trees. I would feel sad if bugs died.

I catch bugs and put them in bug houses. I use recycled bottles and boxes then fill them with rocks, sticks, and leaves. The spiders can build their webs easier with lots of sticks. The earwigs can hide. The beetles can burrow. The bugs really like the sticks and leaves. Their homes help them feel safe. When the bugs are hurt, I help them get better.

I'm glad we have trees and bugs. I like nature.
